7 **BEFORE THE VANCOUVER 9/11 TRIBUNAL**

8 **In re:**

9 Prior Knowledge of the Terror Attacks of
10 September 11, 2001 by Defense Secretary
11 Donald H. Rumsfeld resulting from the
12 Quantum Access Capabilities of the US
13 Defense-Technical Community acquired
14 while Secretary Rumsfeld served secretly
as the Defense Attaché to DARPA's Project
Pegasus in the early 1970's

AFFIDAVIT OF ANDREW D. BASIAGO

15 I, ANDREW D. BASIAGO, being first duly sworn, on oath, depose and state as follows:

- 16 1. My name is Andrew Daniel Basiago.
- 17 2. I am an American citizen.
- 18 3. I was born on September 18, 1961 in Morristown, New Jersey, USA.
- 19 4. I reside in Vancouver, Washington, USA.
- 20 5. I am an attorney-at-law in private practice in the State of Washington.
- 21 6. I was admitted to the Washington State Bar Association in 1996.
- 22 7. Currently, I am an active member in good standing of the Washington State Bar
23 Association.
- 24 8. I maintain a successful solo law practice.

25 **AFFIDAVIT OF WITNESS – 1**

Andrew D. Basiago, Esq.
P.O. Box 2311
Vancouver, WA 98668
(360) 980-4100

- 1 9. I have never been accused of, arrested for, charged with, or convicted of a crime or
2 been disciplined on professional ethical grounds by my bar association.
- 3 10. I am of sound mind and healthy body.
- 4 11. This affidavit is accurate to the best of my ability to remember and tell the true life
5 experiences that I testify to in it and is made without any motive to deceive or purpose
6 of evasion.
- 7 12. During the years 1968 to 1972, I was a child "chrononaut" in Project Pegasus.
- 8 13. A chrononaut is a time traveler.
- 9 14. Project Pegasus was a classified, defense-related, research and development program
10 of the Defense Advanced Research Projects Agency [DARPA.]
- 11 15. DARPA is the agency that develops advanced weapon systems, communication
12 devices, and surveillance technologies for the US Department of Defense.
- 13 16. Project Pegasus was the US time-space program at the time of the emergence of
14 quantum access in the US defense-technical community.
- 15 17. "Quantum access" is the ability to gather information about a non-local event in the
16 time-space continuum by either sending a chrononaut there physically or propagating a
17 hologram of the event through which the chrononaut either views the event or visits the
18 event on a physio-virtual basis.
- 19 18. Non-local events are those scenarios that take place in what we call the past and
20 future but which are actually going on simultaneously in a quantum hologram that
21 consists of a multitude of adjacent similar and dissimilar time lines.
- 22 19. The mission of Project Pegasus was to use quantum access to develop a "remote
23 sensing in time" capability pertaining to non-local events on behalf of the Executive
24 Branch of the United States government.
- 25 20. It was hoped that by developing better intelligence about past and future events,
Project Pegasus would enable the US president, intelligence community, and military
to engage in better contingency planning for future events.
- 21 21. Project Pegasus was trying to accomplish this by developing different time travel
technologies in a research and development program under the aegis of DARPA.
- 22 22. These time travel technologies were advanced electro-magnetic devices, including
23 teleporters, that would enable DARPA to send chrononauts to non-local events and
24 advanced electro-optical devices, including chornovisors, that would enable DARPA to
propagate holograms of non-local events for purposes of remote viewing or physio-
virtual visitation of said non-local events.

- 1 23. A "teleporter" is an electro-magnetic device that by opening up a vortal tunnel in the
2 quantum hologram permits a chrononaut to travel thousands of miles in time-space in
seconds.
- 3 24. Teleporters were fully operational in the secret realms of the US defense-technical
4 community by 1967-68.
- 5 25. A "chronovisor" is an electro-optical device that by driving an electro-magnetic signal
6 through a crystal array propagates a hologram that lense a non-local event into the
laboratory.
- 7 26. Chronovisors were fully operational in the secret realms of the US defense-technical
community by 1967-69.
- 8 27. I am the fifth and youngest child of the American electrical engineer and inventor
9 Raymond Francis Basiago [1923-1990].
- 10 28. From 1966 to 1984, Raymond F. Basiago was employed as a special projects engineer
for The Ralph M. Parsons Corporation of New York, New York [today, Parsons
11 Corporation of Pasadena, California.]
- 12 29. Parsons was the principal US defense contractor involved in DARPA's Project Pegasus,
so principally, in fact, that when Ralph M. Parsons, the founder of Parsons Corporation,
13 bought what was then the world's largest private yacht from the billionaire Adnan
Kashoggi in 1972, Parsons renamed the ship "Pegasus II."
- 14 30. In addition to working for Parsons as an engineer, Raymond F. Basiago secretly held
the rank of Major in the Second Reserve of the US Army.
- 15 31. During his 18 years of employment with the Parsons Corporation ostensibly working on
16 conventional engineering projects, my father was secretly employed as the technical
liaison between Parsons and the CIA on the theory and practice of teleportation.
- 17 32. While it is not clear whether Raymond F. Basiago was ever a CIA officer *per se*, his
18 work with DARPA, the CIA, and other US military and intelligence agencies was
extensive enough for him to be in the CIA employee database.
- 19 33. When I inquired of my father's employment status with the CIA through an intermediary
20 ten years ago, I was told by the CIA that they could not release information to the family
members of living or deceased CIA personnel.
- 21 34. I was first brought into Project Pegasus by my father in 1967-68, when at age six I
22 teleported with him from New Jersey to New Mexico via a teleporter located in Building
68 at the "old" Curtiss-Wright Aeronautical Company facility formerly at 1 Passaic
23 Avenue in Wood Ridge, New Jersey.
- 24 35. This "jump" resulted in me becoming the first American child to teleport.

- 1 36. I was officially enlisted in DARPA's Project Pegasus in Fall 1969, at age seven, at the
2 beginning of my third grade year, when I signed a loyalty and secrecy oath on US
Department of Defense letterhead.
- 3 37. During 1969-72, the learning laboratory for gifted and talented school children at my
4 public elementary school, Mountview Road School in Morris Plains, New Jersey, was
5 used as a training course for time travel activities that I was then involved in at defense
6 contractor locations in New Jersey and New Mexico.
- 7 38. In this educational context, I received alpha intelligence training in such abilities as
8 perception, memory, and communication.
- 9 39. This training included photo-learning on machines called "tachistoscopes" developed by
10 the Office of Naval Research for the education of the 140 gifted and talented American
11 school children enrolled in Project Pegasus and other secret defense and intelligence
12 projects utilizing US school children as "team members."
- 13 40. The curriculum that we studied on the tachistoscope was called "Galileo" and
14 emphasized the history of society and of science from the year 1450. The purpose of
15 this schooling was to give the children who would be time traveling for DARPA
16 knowledge of the social and technical history of the modern era so that we would have
17 this information available to us when we were in the field.
- 18 41. From Fall 1969 to Summer 1972, I was involved in eight different forms of quantum
19 access for DARPA, in which I received specialized education in the learning lab at
20 Mountview and then took part in practical exercises either in the learning laboratory or at
21 a defense contractor location off-campus.
- 22 42. *Remote Viewing.* In Fall 1969, the children in my group were assessed for our psychic
23 ability and then involved in remote viewing exercises for the US Navy's Office of Naval
24 Intelligence. We were asked, *inter alia*, to remotely view the POW compound known as
the "Hanoi Hilton" in North Vietnam and determine whether Lt. John McCain was in the
prison and, if so, where he was in the prison.
- 25 43. *Spinning.* In Spring 1970, the children in my group took part in exercises in which we
were laid on our backs on a table top-like device and spun clockwise at 33 rpm. In this
way, we were trained to go "out-of-body." During one astral projection, I confronted a
barrier that the lady from DARPA who debriefed me stated was the infrastructure
propagating the hologram we exist in, The Matrix.
44. *The Montauk Chair.* In Spring 1970, the children in my group first began to take astral
projections to episodes in our own subjective futures via the time travel technology
known as "the Montauk chair." After returning from these induced astral projections to
our own futures, we were then debriefed about what we saw, and in this way intelligence
was gathered about future events and conditions. According to Dr. David L. Anderson,
the Montauk chair "went national" and involved thousand of American schoolchildren in
probes to episodes in their future lives beginning in Spring 1970. I was one of them.

- 1 45. *The Teleporter*. In Summer 1970, the children in my group first began traveling to the
2 state capitol grounds in Santa Fe, New Mexico via the Tesla teleporter at the Curtiss-
3 Wright Aeronautical Company in Wood Ridge, New Jersey and returning to New Jersey
4 via the teleport located at the Sandia National Laboratory in Sandia, New Mexico,
5 adjacent to the Kirtland Air Force Base northeast of Albuquerque, New Mexico.
- 6 46. *The Chronovisor*. In Fall 1970, the children in my group first began accessing past and
7 future events via third and fourth-dimensional Ernetti-Gemelli chronovisors situated at
8 the General Manufacturing Company in Convent Station, New Jersey; a public
9 auditorium under construction in Morristown, New Jersey; and the ITT Defense
10 Communications facility in Nutley, New Jersey.
- 11 47. *The Plasma Confinement Chamber*. In Spring 1972, my father took me to a time lab in
12 East Hanover, NJ where, under the direction of Dr. Stirling Colgate, I entered a Lucite
13 chamber where plasma was emitted, and while immersed in the plasma, I worm-holed
14 to Gettysburg, PA on November 19, 1863, where I was depicted in the famous
15 Josephine Cobb photograph of Abraham Lincoln at Gettysburg.
- 16 48. *The Stargate*. In Summer 1972, I took trips to 2045 to retrieve microfilmed summaries
17 of intervening events being prepared by project historians in the future. The Stargate
18 through which I jumped was located in the gymnasium at the Cerrillos Cultural Center
19 near Cerrillos, NM. We arrived back in the present on the grounds of the Microwave
20 Tower at the Lobo Overlook site in SW Colorado.
- 21 49. *The Jump Room*. Before I left my period of service attached to Project Pegasus in
22 1972, I witnessed a device, about the size of a microwave oven, through which things
23 like documents from Washington, DC were arriving in New Mexico. I believe that it was
24 this time travel technology from which the jump rooms were developed via which, by the
25 late 1970's, the US government was sending personnel Mars.
50. During the three years that I was officially attached to Project Pegasus from 1969 to
1972, I spent three secret summers in New Mexico living with my father and taking part
in time travel activities undertaken at both atomic research institutions like the Los
Alamos National Laboratories [LANL] and the Sandia National Laboratory and smaller
labs operated by DARPA in the desolate environs of New Mexico.
51. These secret summers were effectuated by my father and I teleporting to New Mexico,
spending the summer there, and then at the end of the summer teleporting back to New
Jersey so as to arrive on the afternoon of the morning that we had left at the beginning
of the summer. In this way, the time loop created by our "quantum displacement" in
New Mexico was closed and time travel was used to conceal time travel research via
the propagation of a time loop and its subsequent disappearance.
52. These "secret" or "hidden" summers were the first Summer 1971, Summer 1973
accessed from Fall 1971, and the first Summer 1972. I say "first Summer 1971 and
1972" because after those summers, my father and I lived second summers, with a
different set of experiences, upon returning to New Jersey.

- 1 53. Consequently, as both a child progressing farther and farther down the rabbit hole of
2 applied quantum physics, and as my father's son, during those three summers, and for
3 shorter periods during the school year when I was in New Mexico after having teleported
4 there, I was frequently present at project social events, including project meetings held
5 at the labs, meals taken at restaurants, drinks had at bars, parties enjoyed at private
6 residences, and receptions held at hotels.
- 7 54. In that context, I met many distinguished Americans who were either project principals,
8 or who were interested in the project's activities, or who were being brought through the
9 project's social network so that they could be briefed about their roles in future events as
10 individuals who had been identified as "persons of interest" related to their personal
11 destinies as national leaders of the United States.
- 12 55. The project principals that I met included Dr. Harold M. Agnew, who served as the
13 federal administrator of Project Pegasus during his tenure as director of LANL [1970-
14 78]; Dr. Edward Teller, who I once met when he was trying to fix a chronovisor at LANL;
15 Dr. Stephen J. Lukasik, when he was serving as the director of DARPA; Dr. Iben
16 Browning, when he was serving as the director of the directorate of science and
17 technology of the CIA [1959-74]; John A. McCone, a former director of the CIA [1960-
18 64]; Dr. Stirling Colgate, when he was president of the New Mexico Institute of Science
19 and Technology [NMIST]; Dr. Emilio Segre, who had a discussion with my father in the
20 hallway at LANL about the existence of teleportation; and Donald H. Rumsfeld, the
21 future Secretary of Defense, who served as the defense attaché of Project Pegasus.
- 22 56. In retrospect, when I consider that three of these individuals [Agnew, Teller, and Segre]
23 were Manhattan Project physicists and that three [Agnew, Lukasik, and McCone] served
24 as the director of major defense and intelligence agencies [LANL, DARPA, and CIA], I
am struck by how important Project Pegasus was and how privileged my father and I
were to be part of it and both witness and participate in the US time-space exploration
program at the time of the emergence of time travel in the US defense-technical
community in the early 1970's.
- 25 57. I also met several future national leaders of the United States at lunches that were held
in Albuquerque, NM with project principals shortly after they were apprised of the fact
that using its quantum access capability DARPA had determined that they were
destined to serve as President or Vice President of the United States. These individuals
included President George H.W. Bush, Vice President Richard B. Cheney, President
George W. Bush, and President William J. Clinton. These lunches were held at La
Hacienda Restaurant in Old Town Albuquerque, where my father's lifelong friend, Mary
Constance Chavez [1928-81], was the cashier
58. In this unusual and unprecedented social milieu, in which American defense officials
operating in the present were sharing intelligence data from the future with both future
national leaders and their colleagues on the project, I had, on occasion, the opportunity
to overhear "shop talk" that was filtering through the social network of Project Pegasus,
in which project principals were revealing what they knew about future events,
developments, and conditions.

1 59. These discussions were in the nature of gossip or project scuttlebutt and presumably
2 should not have been held because the information about the future that Project
3 Pegasus was gathering was supposed to remain secret and only shared with those
4 individuals with a need to know on a "need to know basis only."

5 60. The future events, developments, and conditions that I acquired prior knowledge of as a
6 result of serving as a child on Project Pegasus included, but were not limited to: the
7 resignation of President Richard M. Nixon; the advent of the Internet; the emergence of
8 AIDS as an epidemic disease; the presidencies of US presidents Carter, Bush, Clinton,
9 and Bush; widespread cell phone use in the future; the fact that Donald H. Rumsfeld
10 would one day serve as Defense Secretary; and the attack on the Twin Towers of the
11 World Trade Center on 9/11.

12 61. I am filing this affidavit with the tribunal because I have direct, personal knowledge of
13 the fact that a secret time travel project for which he served as defense attaché gave
14 Donald H. Rumsfeld, who served as US Secretary of Defense during 9/11, prior
15 knowledge of 9/11 thirty years before 9/11.

16 62. While serving on Project Pegasus as a child chrononaut and he as its defense attaché –
17 as the point man between the Department of Defense and project principals like Dr.
18 Agnew and my father – I had extensive contact with Mr. Rumsfeld.

19 63. In Spring 1971, I attended a lecture that Mr. Rumsfeld gave to about 15 young people
20 on the project. This lecture was held at an underground amphitheater at the Cerrillos
21 Cultural Center near Cerrillos, NM. During the lecture, Mr. Rumsfeld thanked us for our
22 participation in the program, admonished us to keep our knowledge of the time travel
23 technologies involved absolutely secret because the national security of the United
24 States depended on it, and informed us that the significance of teleportation was
25 primarily military in that it would enable the US Army to put troops precisely where they
were needed on the battlefield.

64. I greeted Mr. Rumsfeld as we entered the same amphitheater at the Cerrillos Cultural
Center for a later briefing. Sticking out my hand and imitating adults, I introduced myself
as simply "Basiago." Following suit, he shook my hand and replied: "Rumsfeld."

65. I was in the company of my father in 1971 when we entered a bar in Albuquerque and
my father had a conversation with Mr. Rumsfeld in which my father and Mr. Rumsfeld
commiserated about being involved in a program that was involving American school
children in time travel. During this conversation, my father informed him that the
program had determined that he was destined to "make" Defense Secretary. Mr.
Rumsfeld replied: "I know that, Ray. I read that in one of the reports. But that's one
future event that I'll only believe when it happens."

66. I was again in the company of my father in 1972 when my father was briefed by Mr.
Rumsfeld about the fact that upon high school graduation the children in the program
would be admitted to the US Naval Academy at Annapolis "as a pretext for involving
them in future project activities," as Mr. Rumsfeld stated.

- 1 67. In addition, I was a guest at an afternoon reception at a downtown hotel in Albuquerque.
2 After drinks were served, Mr. Rumsfeld regaled those around him with stories of his
exploits as a naval aviator during the Korean War.
- 3 68. The 9/11 event was spoken of openly within Project Pegasus' inner circle. I think this
4 was the case because it was not only a future event that had been detected by the
5 program but because it was a dramatic future event; it was a future event that had
6 implications for the national security of the United States; and it was a future event that
involved something that had not been seen since the War of 1812, which was a
coordinated attack on the US mainland.
- 7 69. One time, in a restaurant in Albuquerque, NM, one of the project engineers asked my
8 father what he knew about this future event. "What can you tell me about the event
9 called 9-1-1, Ray? Apparently, it's some kind of domestic Pearl Harbor?" My father
10 responded, matter-of-factly: "Middle Eastern terrorists hijack commercial airliners and fly
11 them into the Twin Towers in New York City." "What happens then, Ray?" the project
12 engineer asked. My father answered: "The Twin Towers come tumbling down, like a ton
13 of bricks." "God, how awful," the project engineer sighed. "What happens after that?"
14 My father answered: "The country picks itself up, dusts itself off, and goes on like
15 nothing happened."
- 16 70. While this was typical of the kind of informal discussion about 9/11 that I overheard as a
17 boy while serving on Project Pegasus, my father and I were actually shown visual
18 evidence of the future attacks of 9/11 that had been retrieved by the project from 30
19 years in the future.
- 20 71. One afternoon during our Summer 1971 stay in New Mexico, my father and I had just
21 finished lunch at the La Hacienda Restaurant in Old Town Albuquerque, when my father
22 was called to the telephone. He listened intently, and then said: "I'll be right down."
23 When he hung up the phone, he said: "Let's go." When we were in the car, I asked my
24 father where we were going. He said, tersely: "Aerojet."
- 25 72. My father sped to our destination. The Aerojet Corporation was in Socorro, NM, a
distance of 90 miles south of Albuquerque. We reached Aerojet in a little over an hour,
meaning that we must have been traveling at 80 to 85 mph for my father to get us there
so swiftly by private automobile. At Aerojet, we were shown astonishing evidence, so, in
retrospect, I can understand my father's excitement.
73. In those years, the Aerojet Corporation facility was at the corner of Bullock Avenue and
Leroy Place on the New Mexico Institute of Science and Technology [NMIST] campus in
Socorro, NM. It was a small, C-shaped building with a zero-scaped courtyard. A small
macadam parking lot on the grass in front of the building accommodated about 10 cars.
When one turned left while traveling west on Bullock Avenue to park in this small
parking lot, one passed a sign consisting of a slab of black granite with silver letters that
read "Aerojet Corporation." The Aerojet Corporation facility on the NMIST campus was
processing images of future events retrieved by US chrononauts from the future.

- 1 74. During one of three fact-finding trips about my project experiences that I took to New
2 Mexico in 2003, 2004, and 2008, Joy Thompson, the head research librarian for NMIST,
3 not only confirmed that a C-shaped Aerojet Corporation building was present on the
4 grounds of NMIST in the early 1970's, but that in those years it was misidentified on the
5 campus maps published inside the official NMIST course catalogues as either Gibbons
6 Hall, a student union of NMIST, or as the National Radio Astronomy Observatory, which
7 is located a mile west of NMIST. This was contrary to what I had been told by Aerojet
8 before making my 2004 trip to New Mexico. They told me that Aerojet did not have a
9 corporate presence in Socorro until 1985, when, in fact, it was in 1985 that Aerojet built
10 its present facility on the NMIST campus and tore down its earlier, C-shaped building.
- 11 75. When, in 1971, my father and I entered the Aerojet building through a door in the interior
12 of the "C," my father showed an armed security guard his Department of Defense
13 identification card and told the guard, "My son's with me." The guard pushed a button
14 and prison cell-like bars blocking access to the secured left side of the building retracted
15 into the ceiling and we walked down the hall.
- 16 76. We were greeted in the hall by one of the photo-analysts processing images from the
17 future at the Aerojet facility. I remember that my father had explained that some of these
18 photo-analysts were graduate physics students studying under Dr. Stirling Colgate, who
19 was then serving as President of NMIST and chair of its physics department. The
20 photo-analyst was very excited and as he approached my father and I excitedly
21 informed my father: "We've got it, Ray! We've got images of the event!" My father shook
22 his head in bemused bewilderment.
- 23 77. The photo-analyst led us into a small room that had about 20 TV monitors stacked all
24 over the place in a hodgepodge manner. The small photo-analytical lab was dense with
25 TV monitors and video cassette consoles. The photo-analyst then took a beta video
cassette and with trembling hands popped it into a beta video console. "Watch this!" he
told us. The TV screen illuminated with a set of large square pixels that formed from the
jagged leading edge of what appeared to be a fragment of videotape. This might have
been the remnant of one of the microfilms of the sort that we were retrieving from the
year 2045.
78. When the picture pixilated into view, we saw sun glinting off of a commercial passenger
airliner as it entered the scene from the left, traveled across the screen slowly, and
crashed into one of the Twin Towers in Downtown Manhattan, causing a dense fireball
to erupt in the area of its impact with the building. The videotape loop that we were
shown was approximately 20 seconds in duration. Every time the fireball would erupt
and the loop would conclude, the photo-analyst would replay the videotape loop, and
every time the plane again struck one of the Twin Towers, he and another young photo-
analyst watching would exclaim "Bam!" as if they were replaying a replay of a "slam
dunk" in a televised basketball game. I believe that what we were shown was the
second plane strike that would take place 30 years in the future on 9/11 and its resulting
fireball. Certainly, the footage was indistinguishable from the video evidence of the
attack on the Twin Towers that has been broadcast widely since 9/11.

- 1 79. In light of the fact that my father and I learned of 9/11 while attached to Project Pegasus,
2 it is certain that Mr. Rumsfeld did, too. After all, he was the defense attaché for the
3 program, which placed him at a higher level of responsibility than my father. Inevitably,
4 Mr. Rumsfeld would have been shown the visual evidence of the future event, as my
5 father and I were shown that day at the Aerojet Corporation in Socorro, NM in 1971; or
6 would have read of the future terror attack associated with the term "9/11" in one of the
7 intelligence reports about future events that were being circulated in the leadership
8 echelon of the program and among top intelligence officials; or would have heard 9/11
9 discussed in casual conversations between project principals.
- 10 80. This evidence establishes that 30 years prior to 9/11, and on the day of 9/11, the US
11 Secretary of Defense, Donald H. Rumsfeld, had prior knowledge of 9/11.

12 DATED this 11th day of September, 2012

13 
14 ANDREW D. BASIAGO,
15 US Chrononaut, 1968-72, 1980-84

16 STATE OF WASHINGTON)
17 : ss.
18 COUNTY OF CLARK)

19 SUBSCRIBED AND SWORN to before me this 11th day of September 2012.

26 
27 NOTARY PUBLIC OF WASHINGTON
28 My commission expires

29 10/12/2015
