

DARPA
PROJECT PEGASUS

Project Pegasus

Category:

[Organizations - Political Organizations](#)

Description:

Project Pegasus is a quest. Project Pegasus was begun in 1968 by Andrew D. Basiago, when he was serving as a child participant in the US time-space exploration program, Project Pegasus. Andy, a lawyer in private practice in Washington, was the first American child to teleport and one of America's early time-space explorers, as told in his soon-to-be-published book, *Once Upon a Time in Time's Stream: My Adventures in Project Pegasus at the Dawn of the Time-Space Age*. Andy serves as Team Leader of Project Pegasus. The mission of Project Pegasus is to lead the legal and political campaign to urge the US government to disclose its teleportation capability, so that this life-advantaging technology can be used by humanity to achieve planetary sustainability.

HOUR ONE

Andrew D. Basiago - Comments, Questions & Answers
October 18, 2009

Andrew D. Basiago returns to the program for a three hour discussion on Mars, life on Mars, Human activity there and his teleportation to the red planet and much more. We begin with the first hour to take some questions from our listeners. Topics Discussed: Bringing Metal objects while teleporting, Suits, Description of the jump room and the device, Courtney M Hunt. Does it take a lot of Energy to run the Jump Room, the Chronovisor or the Teleportation Device? Tokamak Fusion Test Reactor at Princeton University, Inventions of Tesla, Death Ray Experimentation, Keeping things Secret, FBI and CIA confiscation of Tesla's work, Foreknowledge of 9/11, We also discuss more on Bill Richardson, the David Wilcock/Andrew Basiago controversy and much

more.

We continue our discussion for another two hours in our members section with Andrew. We go into greater detail about Andrews trip to Mars, We discuss: The importance of New Mexico in terms of Military, Martian humanoids, Meeting the Martians on Earth, their language and Appearance, their high pitched voices and body structure, time displacement, quantum displacement, the Hunt family, the teleportation trip to Mars, Andrew didn't want to go to Mars at first, saving the human race, the atmosphere and smell on Mars, Andrew arrived in an underground bunker where the "elevator" was located on Mars. We discuss the cataclysm in 9500 B.C. that affected Mars and Earth, pyramids, Baalbek as a space port, Pharaoh Statues, the work of Carl Munch, the face on Mars, Giza in Egypt, the Earth and Mars link, skull fossils on Mars, What area did Andrew go to on Mars? The PIA10214 image, acclimatization on Mars. What was Andrews purpose for going to Mars? Hebefrenia, various life forms on Mars, insect hybrids, simulations or "threat tests", personnel being eaten on Mars, Plesiosaurs, different species, the "dog man", Human animal hybrids, genetic experiments on Mars, visitation to Mars on two occasions. Do the Martians want to come to Earth? We talk about Courtney Brown's Remote Viewing of Martian bases on Earth, the dominant races on Mars: Humanoids & Grays, Human underground bases on Mars. What is the civilization like on Mars? We talk about NASA and their exploration rovers, critics of Andrews work from NASA, the Moon mission, secret space program, Tom Van Flandern. Why the Secrecy about Life on Mars? We also talk about the Brookings report, origins of life on Earth, oil based economy, ecology, pollution free transportation and "free energy".

DARPA

Defense Advanced Research Projects Agency

Agency overview

Formed	1958
Headquarters	Arlington, Virginia
Employees	240
Annual budget	\$3.2 billion
Agency executive	Regina E. Dugan ^[1] , Director
Website	www.darpa.mil

DARPA headquarters in the [Virginia Square](#) neighborhood of Arlington.

The Defense Advanced Research Projects Agency (DARPA) is an [agency](#) of the [United States Department of Defense](#) responsible for the development of new [technology](#) for use by the [military](#). DARPA has been responsible for funding the development of many technologies which have had a major effect on the world, including [computer networking](#), as well as [NLS](#), which was both the first [hypertext](#) system, and an important precursor to the contemporary ubiquitous [graphical user interface](#).

Its original name was simply Advanced Research Projects Agency (ARPA), but it was renamed DARPA (for Defense) during March 1972, then renamed ARPA again during February 1993, and then renamed DARPA again during March 1996.

DARPA was established during 1958 (as ARPA) in response to the Soviet launching of [Sputnik](#) during 1957, with the mission of keeping U.S. military technology more sophisticated than that of the nation's potential enemies. From DARPA's own introduction,^[2]

DARPA's original mission, established in 1958, was to prevent technological surprise like the launch of Sputnik, which signaled that the Soviets had beaten the U.S. into space. The mission statement has evolved over time. Today, DARPA's mission is still to prevent technological surprise to the US, but also to create technological surprise for our enemies.

DARPA is independent from other more conventional military [R&D](#) and reports directly to senior Department of Defense management. DARPA has around 240 personnel (about 140 technical) directly managing a \$3.2 billion budget. These figures are "on average" since DARPA focuses on short-term (two to four-year) projects run by small, purpose-built teams.

DARPA's mission

DARPA's own introduction:^[2]

DARPA is a Defense Agency with a unique role within DoD. DARPA is not tied to a specific operational mission: DARPA supplies technological options for the entire Department, and is designed to be the "technological engine" for transforming [DoD](#).

Near-term needs and requirements generally drive the Army, Navy, Marine Corps, and Air Force to focus on those needs at the expense of major change. Consequently, a large organization like DoD needs a place like DARPA whose only charter is radical innovation.

DARPA looks beyond today's known needs and requirements. As military historian John Chambers noted, "None of the most important weapons transforming warfare in the 20th century – the airplane, tank, radar, jet engine, helicopter, electronic computer, not even the atomic bomb – owed its initial development to a doctrinal requirement or request of the military."^[3] None of them. And to this list, DARPA would add unmanned systems, [Global Positioning System](#) (GPS) and [Internet](#) technologies.

DARPA's approach is to imagine what capabilities a military commander might want in the future and accelerate those capabilities into being through technology demonstrations. These not only provide options to the commander, but also change minds about what is technologically possible today.

DARPA as a model

According to former DARPA Director [Tony Tether](#) and [W. B. Bonvillian](#) ("Power Play," W. B. Bonvillian, [The American Interest](#), Volume II, p 39, November-December 2006), DARPA's key characteristics to be replicated to reproduce DARPA's success are:^[4]

- Small and flexible: DARPA has only about 140 technical professionals; some have referred to DARPA as "100 geniuses connected by a travel agent."^[citation needed]^[who?]
- Flat organization: DARPA avoids hierarchy, essentially operating at only two management levels to ensure the free and rapid flow of information and ideas, and rapid decision-making.
- Autonomy and freedom from bureaucratic impediments: DARPA has an exemption from Title V civilian personnel specifications, which provides for a direct hiring authority to hire talent with the expediency not allowed by the standard civil service process.
- Eclectic, world-class technical staff and performers: DARPA seeks great talent and ideas from industry, universities, government laboratories, and individuals, mixing disciplines and theoretical and experimental strengths. DARPA neither owns nor operates any laboratories or facilities, and the overwhelming majority of the research it sponsors is done in industry and universities. Very little of DARPA's research is performed at government labs.
- Teams and networks: At its very best, DARPA creates and sustains great teams of researchers from different disciplines that collaborate and share in the teams' advances.
- Hiring continuity and change: DARPA's technical staff is hired or assigned for four to six years. Like any strong organization, DARPA mixes experience and change. It retains a base of experienced experts – its Office Directors and support staff – who are knowledgeable about DoD. The staff is rotated to ensure fresh thinking and perspectives, and to have room to bring technical staff from new areas into DARPA. It also allows the program managers to be bold and not fear failure.
- Project-based assignments organized around a challenge model: DARPA organizes a significant part of its portfolio around specific technology challenges. It foresees new innovation-based capabilities and then works back to the fundamental breakthroughs required to make them possible. Although individual projects typically last three to five years, major technological challenges may be addressed over longer time periods, ensuring patient investment on a series of focused steps and keeping teams together for ongoing collaboration. Continued funding for DARPA projects is based on passing specific milestones, sometimes called "go/no-go's."
- Outsourced support personnel: DARPA extensively leverages technical, contracting, and administrative services from other DoD agencies and branches of the military. This provides DARPA the flexibility to get into and out of an area without the burden of sustaining staff, while building cooperative alliances with its "agents." These outside agents help create a constituency in their respective organizations for adopting the technology.
- Outstanding program managers: The best DARPA program managers have always been freewheeling zealots in pursuit of their goals. The Director's most important task is to recruit and hire very creative people with big ideas, and empower them.
- Acceptance of failure: DARPA pursues breakthrough opportunities and is very tolerant of technical failure if the payoff from success will be great enough.
- Orientation to revolutionary breakthroughs in a connected approach: DARPA historically has focused not on incremental but radical innovation. It emphasizes high-risk investment, moves from fundamental technological advances to prototyping, and then hands off the system development and production to the military services or the commercial sector.
- Mix of connected collaborators: DARPA typically builds strong teams and networks of collaborators, bringing in a range of

technical expertise and applicable disciplines, and involving university researchers and technology firms that are often not significant defense contractors or beltway consultants.

History

DARPA was created as the Advanced Research Projects Agency (ARPA), by Public Law 85-325 and Department of Defense Directive 5105.41, in February 1958. Its creation was directly attributed to the launching of [Sputnik](#) and to U.S. realization that the [Soviet Union](#) had developed the capacity to rapidly exploit military technology. Additionally, the political and defense communities recognized the need for a high-level Department of Defense organization to formulate and execute R&D projects that would expand the frontiers of technology beyond the immediate and specific requirements of the Military Services and their laboratories. In pursuit of this mission, DARPA has developed and transferred technology programs encompassing a wide range of scientific disciplines which address the full spectrum of national security needs.

From 1958-1965, ARPA's emphasis centered on major national issues, including space, ballistic missile defense, and nuclear test detection. During 1960, all of its civilian space programs were transferred to the [National Aeronautics and Space Administration \(NASA\)](#) and the military space programs to the individual Services. This allowed DARPA to concentrate its efforts on the [DEFENDER](#) (defense against ballistic missiles), [Project Vela](#) (nuclear test detection), and [AGILE](#) (counterinsurgency R&D) Programs, and to begin work on computer processing, behavioral sciences, and materials sciences. The DEFENDER and AGILE Programs formed the foundation of DARPA sensor, surveillance, and directed energy R&D, particularly in the study of radar, infrared sensing, and x-ray/gamma ray detection.

During the late 1960s, with the transfer of these mature programs to the Services, ARPA redefined its role and concentrated on a diverse set of relatively small, essentially exploratory research programs. The Agency was renamed the Defense Advanced Research Projects Agency (DARPA) in 1972, and during the early 1970s, it emphasized direct energy programs, information processing, and tactical technologies.

Concerning information processing, DARPA made great progress, initially through its support of the development of [time-sharing](#) (all modern operating systems rely on concepts invented for the [Multics](#) system, developed by a cooperation between [Bell Labs](#), [General Electric](#) and [MIT](#), which DARPA supported by funding [Project MAC](#) at MIT with an initial two-million-dollar grant), and later through the evolution of the [ARPANET](#) (the first wide-area packet switching network), Packet Radio Network, Packet Satellite Network and ultimately, the [Internet](#) and research in the [artificial intelligence \(AI\)](#) fields of speech recognition and signal processing. DARPA also funded the development of the [Douglas Engelbart's](#) NLS computer system and the [Aspen Movie Map](#), which was probably the first [hypermedia](#) system and an important precursor of [virtual reality](#).

The [Mansfield Amendment](#) of 1973 expressly limited appropriations for defense research (through ARPA/DARPA) to projects with direct military application. Some^{[[who?](#)]} contend that the amendment devastated American science, since ARPA/DARPA was a major funding source for basic science projects of the time; the [National Science Foundation](#) never made up the difference as expected. But the resulting "[brain drain](#)" is also credited with boosting the development of the fledgling personal computer industry. Many young computer scientists fled from the universities to startups and private research labs like [Xerox PARC](#).

From 1976-1981, DARPA's major thrusts were dominated by air, land, sea, and space technology, such as follow-on forces attack with standoff weapons and associated Command, Control, and Communications; tactical armor and anti-armor programs; infrared sensing for space-based surveillance; high-energy laser technology for space-based missile defense; antisubmarine warfare; advanced cruise missiles; advanced aircraft; and defense applications of advanced computing. These large-scale technological program demonstrations were joined by integrated circuit research, which resulted in submicrometre electronic technology and electron devices that evolved into the Very Large Scale Integration ([VLSI](#)) Program and the Congressionally mandated charged particle beam program. Many of the successful programs were transitioned to the Services, such as the foundation technologies in [automatic target recognition](#), space based sensing, propulsion, and materials that were transferred to the [Strategic Defense Initiative Organization \(SDIO\)](#), later known as the [Ballistic Missile Defense Organization \(BMDO\)](#), now titled the [Missile Defense Agency \(MDA\)](#).

During the 1980s, the attention of the Agency was centered on information processing and aircraft-related programs, including the [National Aerospace Plane \(NASP\)](#) or [Hypersonic Research Program](#). The [Strategic Computing Program](#) enabled DARPA to exploit advanced processing and networking technologies and to rebuild and strengthen relationships with universities after the [Vietnam War](#). In addition, DARPA began to pursue new concepts for small, lightweight satellites ([LIGHTSAT](#)) and directed new programs regarding defense manufacturing, submarine technology, and armor/anti-armor.

On October 28, 2009 the agency broke ground on a new facility in Arlington, Virginia a few miles from the Pentagon.^{[[5\]](#)}

Directors^{[[6\]](#)}

Name	Tenure
Roy W. Johnson	1958 – 1959
Austin W. Betts	1960 – 1961
Jack P. Ruina	1961 – 1963
Robert L. Sproull	1963 – 1965
Charles M. Herzfeld ^{[7]}	1965 – 1967
Eberhardt Rechtin	1967 – 1970
Steve J. Lukasik ^{[8]}	1970 – 1975
George H. Heilmeier	1975 – 1977
Robert R. Fossum	1977 – 1981
Robert S. Cooper	1981 – 1985
Robert C. Duncan	1985 – 1988
Ray S. Colladay	1988 – 1989
Craig I. Fields	1989 – 1990
Victor H. Reis	1990 – 1992
Gary L. Denman	1992 – 1995

Verne L. "Larry" Lynn	1995 – 1998
Fernando L. "Frank" Fernandez	1998 – 2001
Anthony J. Tether	2001 – 2009
Regina E. Dugan	2009 – present

Organization

Current program offices

DARPA has seven program offices, all of which report to the DARPA director.

- The [Adaptive Execution Office \(AEO\)](#) mission is to conceive and execute novel technology and system developments that are adaptive both in end function and in the process by which they are developed and to improve the transition worthiness of DARPA programs across the enterprise.^[9]
- The [Defense Sciences Office \(DSO\)](#) vigorously pursues the most promising technologies within a broad spectrum of the science and engineering research communities and develops those technologies into important, radically new military capabilities.^[10]
- The [Information Processing Techniques Office \(IPTO\)](#) focuses on inventing the networking, computing, and software technologies vital to ensuring DOD military superiority.
- The [Microsystems Technology Office \(MTO\)](#) mission focuses on the heterogeneous microchip-scale integration of electronics, photonics, and microelectromechanical systems (MEMS). Their high risk/high payoff technology is aimed at solving the national level problems of protection from biological, chemical and information attack and to provide operational dominance for mobile distributed command and control, combined manned/unmanned warfare, and dynamic, adaptive military planning and execution.
- The [Strategic Technology Office \(STO\)](#) mission is to focus on technologies that have a global theater-wide impact and that involve multiple Services.^[11]
- The [Tactical Technology Office \(TTO\)](#) engages in high-risk, high-payoff advanced military research, emphasizing the "system" and "subsystem" approach to the development of aeronautic, space, and land systems as well as embedded processors and control systems. This research includes an effort within the TTO to develop a small satellite [launch vehicle](#).^[12] This vehicle is under development by [AirLaunch LLC](#).^[13] This is part of the [Force Application and Launch from Continental United States](#) (FALCON) effort.
- The [Transformational Convergence Technology Office \(TCTO\)](#) mission is to advance new crosscutting capabilities derived from a broad range of emerging technological and social trends, particularly in areas related to computing and computing-reliant subareas of the life sciences, social sciences, manufacturing, and commerce.^[14]

Former offices

- [Information Awareness Office](#) - 2002-2003
- The [Advanced Technology Office \(ATO\)](#) researched, demonstrated, and developed high payoff projects in maritime, communications, special operations, command and control, and information assurance and survivability mission areas.
- The [Special Projects Office \(SPO\)](#) researched, developed, demonstrated, and transitioned technologies focused on addressing present and emerging national challenges. SPO investments ranged from the development of enabling technologies to the demonstration of large prototype systems. SPO developed technologies to counter the emerging threat of underground facilities used for purposes ranging from command-and-control, to weapons storage and staging, to the manufacture of weapons of mass destruction. SPO developed significantly more cost-effective ways to counter proliferated, inexpensive cruise missiles, UAVs, and other platforms used for weapon delivery, jamming, and surveillance. SPO invested in novel space technologies across the spectrum of space control applications including rapid access, space situational awareness, counterspace, and persistent tactical grade sensing approaches including extremely large space apertures and structures.

- [SURAN](#)
- [Project Vela](#)

Notable fiction

ARPA/DARPA is well known as a high-tech government agency, and as such has many appearances in popular fiction. Appearances can be classed into three forms. The first are more or less realistic references. Second are references that incorrectly attribute to ARPA an operational or political role, in addition to its high-tech responsibilities. Finally are those that want a realistic government reference, but are not DARPA specific - any other agency would do as well. These are numerous and not particularly notable.

Some realistic references to ARPA in fiction are in [Tom Swift](#) and the Visitor from Planet X (DARPA consults on a technical threat)^[18], in episodes of television program [The West Wing](#) (the ARPA-DARPA distinction), and in the motion picture [Executive Decision](#) (use of a one-of-a-kind experimental prototype in an emergency).

Non-realistic references often attribute to DARPA an operational or political role, in addition to its real high-tech responsibilities. Examples are the [Matthew Reilly](#) books [Temple](#) and [Hell Island](#), the [James Rollins](#)' books [Sandstorm](#) and [Black Order](#), and the video game series [Metal Gear Solid](#). Chronovisor Device

In this fascinating, six-hour interview, (links below) American lawyer Andrew D. Basiago, 47, narrates the hidden history of his discovery of life on Mars in 2008 and reveals the fact that by 1968 the US intelligence community was already aware of aspects of his later Mars work.

Andy relates his experiences in DARPA's Project Pegasus during the period 1969 to 1972, and describes probes to past and future events that he took via teleportation and chronovision during the early days of time-space exploration by the US government.

He confirms that the United States has been teleporting individuals to Mars for decades, and recounts the awe-inspiring and terrifying trips that he took to Mars in 1981 after he was tapped to go there because he had teleported as a child participant in

Project Pegasus.

I first met Andy in July 2009 at ECETIs Science, Spirit and World Transformation Conference near Mt. Adams, Washington, where we were both featured speakers.

During his lecture, Andy shared numerous photographic images evidencing his discovery of life on Mars, including many photos of humanoid beings, different animal species, carved statues and built structures on Mars that put him at the forefront of Mars research.

Throughout the weekend, Andy lectured at his table to small groups of conference-goers, who came and sat in rapt attention as he shared stories about his experiences as a child in Project Pegasus, the secret US research program in which time travel was the focus.

I know that, like me, everybody who took part in those impromptu seminars was certain that Andy is, as Bill Ryan of Project Camelot a truth-teller with significant new information -stated recently, the real deal to share about the real Philadelphia Experiment.

In this interview, Andy tells the phenomenal story of seven briefings over 40 years in which he was shown evidence of his destiny involving the discovery of life on Mars, and explains how the emergence of time travel and this epochal future event were interlinked.

According to Andy, by 1968, the CIA was already teleporting individuals to the past and future to retrieve artifacts there and bring them back while propagating holograms of past and future events with devices called chronovisors to also gather intelligence.

Incredibly, as a result of this quantum access, in 1971 Andy was given a copy of his landmark paper The Discovery of Life on Mars and asked to read and remember it, so that when he wrote it, in 2008, it would contain as much data about Mars as possible! A book and film about Andys experiences in Project Pegasus are in development and he will soon be featured by Project Camelot.

This must hear interview is an introduction to a major figure in the Disclosure Movement and an emerging 21st century visionary, who is fighting the good fight to bring his important story to light."

bio and current address as a lawyer on facebook:

[\[link to www.facebook.com\]](http://link.to/www.facebook.com)

He was born on September 18, 1961 in Morristown, New Jersey, the youngest of five children, and grew up in Northern New Jersey and Southern California.

Andy was one of the "whiz kids" who served from 1969 to 1972 in DARPA's time-space exploration program, Project Pegasus. Soon, he will publish his long-awaited memoir of his childhood experiences in US time travel research at the time of its emergence.

A past member of Mensa, the high IQ society, Andy holds five academic degrees, including a Bachelor of Arts in History from UCLA and a Master of Philosophy from the University of Cambridge.

While an undergraduate at UCLA, he became a journalist and a protégé of editor Norman Cousins of the Saturday Review, who once compared Andy to Robert Hutchins and nominated him to be the Editor of the Bulletin of the Atomic Scientists.

Andy was inspired by a meeting with the futurist Buckminster Fuller in 1981 to pursue a career in environmental policy. After their meeting, Fuller wrote: "Andrew Basiago's integrity augurs well for humanity's continuance in (the) Universe."

He began his career writing articles about the urban environment for Los Angeles newspapers, national periodicals, and the Cousteau Society journal Calypso Log.

Andy studied environmental law at Northwestern School of Law of Lewis & Clark College in Portland, Oregon, and then went on to design nature-friendly urban plans for cities in California and study environmental law with Professor Malcolm Grant at Cambridge.

His papers about the theory and practice of urban sustainability have been published in international, peer-reviewed journals in Australia, Britain, and the United States, cited widely, and placed in the environmental policy collections of university libraries.

Andy was admitted to the Washington State Bar Association in 1996.

A lawyer in private practice, he specializes in personal injury law while representing and collaborating with writers and filmmakers in the development of books, TV shows, and feature films with planetary and interplanetary themes.

Recently, Andy edited several major works related to humanity's contact with extraterrestrial life.

He was the editor of Alfred Lambremont Webre's book, Exopolitics: Politics, Government and Law in the Universe (Universe Books, 2005), which uses as a case study human contact with an advanced civilization on Mars.

He also edited The Fátima Trilogy by Joaquim Fernandes, Fina d'Armada, and others (Anomalist Books, 2007), a definitive history of the Fátima Incident of 1917 that explores its extraterrestrial aspects.

Andy founded the Mars Anomaly Research Society (MARS) in 2008 after discovering evidence of life in a photograph of the Red Planet beamed back to Earth by NASA's Mars Exploration Rover Spirit and writing about it in his landmark paper The Discovery of Life on Mars.

His discovery of life on Mars might be an epochal event in history. His crusade to evaluate and prove his findings and bring them to public light has been called "heroic."

About his discovery of life on Mars, Andy stated:

"From my perspective, the question that now confronts us is not 'Shall we permit the belief that Mars is inhabited?' but rather, 'How shall we think about it, now that we have knowledge that another planet in our solar system harbors life?'"

Two whistleblowers independently report teleporting to Mars and meeting Martian extraterrestrials

Two whistleblowers, both formerly involved in secret research and development projects undertaken by US defense agencies, have independently verified their secret teleportation to US bases on Mars, and to meeting intelligent Martian extraterrestrial life. Their accounts are now available on the Internet, and can be seen below in this article.

One of the whistleblowers, Arthur Neumann, who until recently referred to himself as [Henry Deacon](#), was formerly associated with a U.S. government agency,

On July 25, 2009, at the [European Exopolitics Congress](#) in Barcelona, Mr. Neumann publicly stated, "There is life on Mars. There are bases on Mars. I have been there." The following day, Mr. Neumann participated in [Futuretalk](#), a Project Camelot documentary interview, in which he provided details of his teleporting to a base on Mars and participating in a one-hour project meeting, which was also attended by representatives of an intelligent civilization that lives in cities under the surface of Mars.

Dean & Project Camelot: Underground city on Mars

The other whistleblower, lawyer [Andrew D. Basiago](#), is a former child participant in a secret time travel project launched by the US Defense Advanced Research Projects Agency (DARPA). In a six-hour interview released August 31, 2009, Mr. Basiago "relates his experiences in DARPA's Project Pegasus during the period 1969 to 1972, and describes probes to past and future events that he took via teleportation and chronovision during the early days of time-space exploration by the US government.

"He [Mr. Basiago] confirms that the United States has been teleporting individuals to Mars for decades and recounts the awe-inspiring and terrifying trips that he took to Mars in 1981 after he was tapped to go there because he had teleported as a child participant in Project Pegasus."

Mr. Basiago has also publicly confirmed that in 1970, in the company of his late father, Raymond F. Basiago, an engineer for The Ralph M. Parsons Company who worked on classified aerospace projects, he met three Martian astronauts at the Curtiss-Wright Aeronautical Company facility in Wood Ridge, New Jersey while the Martians were there on a liaison mission to Earth and meeting with US defense-technical personnel.

Whistleblower Arthur Neumann and bases on Mars

Arthur Neumann's verification of the existence of bases on Mars, and of having personally been to Mars, occurred at the end of Command Sgt. Major (USAF retired) Robert Dean's presentation at the European Exopolitics Summit and can be seen beginning at 54 minutes into the presentation (above).

During his presentation, Robert Dean showed satellite images of an apparent city under the surface of Mars, as well as an apparent base on the surface of Mars.

ROBERT DEAN AFFIRMS THIS INFORMATION

The July 26, 2009 [Futuretalk interview](#), during which Mr. Neumann spoke about the details of his teleportation to Mars for a one-hour project meeting on Mars attended by Martian humanoids, was conducted by Bill Ryan and Kerry Cassidy of Project Camelot, with the participation of Robert Dean and Alfred Lambremont Webre.

Whistleblower Andrew D. Basiago and the hidden history of the discovery of life on Mars

Mr. Basiago was recently featured in "A Conversation with Andrew D. Basiago," a six-hour interview posted by Jessica Schab on YouTube.

In the 39-part interview, he relates his experiences in DARPA's Project Pegasus as one of America's early time-space explorers during the period 1969-72 and narrates the seven episodes over 40 years in which the CIA, in possession of a "quantum access" capability since 1967-68, briefed him about his destiny as a public figure who would one day be principally associated with the discovery of life on Mars.

Ms. Schab writes that in this "six-hour interview, American lawyer Andrew D. Basiago, 47, narrates the hidden history of his discovery of life on Mars in 2008 and reveals the fact that by 1968 the US intelligence community was already aware of aspects of his later Mars work.

Dean & Project Camelot: Secret base on Mars

"Andy tells the phenomenal story of seven briefings over 40 years in which he was shown evidence of his destiny involving the discovery of life on Mars, and explains how the emergence of time travel and this epochal future event were interlinked.

"According to Andy, by 1968, the CIA was already teleporting individuals to the past and future to retrieve artifacts there and bring them back, while propagating holograms of past and future events with devices called chronovisors to also gather intelligence.

"Incredibly, as a result of this quantum access, Andy was given a copy of his landmark paper [The Discovery of Life on Mars](#) in 1971 and asked to read and remember it, so that when, in 2008, he wrote it, it would contain as much data about Mars as possible!"

Public presentation of the discovery of life on Mars

Ms. Schab writes, "I first met Andy in July 2009 at ECETI's Science, Spirit and World Transformation Conference near Mt. Adams,

Washington, where we were both featured speakers.”

Mr. Basiago and Alfred Lambremont Webre co-presented at the ECETI conference on the discovery of life on Mars and its implications.

Ms. Schab continues, “During his lecture, Andy shared numerous photographic images evidencing his discovery of life on Mars, including many photos of humanoid beings, different animal species, carved statues and built structures on Mars that put him at the forefront of Mars research.

“Throughout the weekend, Andy lectured at his table to small groups of conference-goers, who came and sat in rapt attention as he shared stories about his experiences as a child in Project Pegasus, the secret US research program in which time travel was the focus.

“I know that, like me, everybody who took part in those impromptu seminars was certain that Andy is, as Bill Ryan of Project Camelot stated recently, the real deal -- a truth-teller with significant new information to share about the real Philadelphia Experiment.”

How to evaluate the significance of the Mars testimony of Arthur Neumann and Andrew D. Basiago

Arthur Neumann and Andrew D. Basiago are each intelligent, credible professionals with histories as former participants in top secret projects sponsored by US government agencies, including DARPA. Their separate and independent revelations that each has secretly teleported to bases on Mars provide strong corroborative evidence for the existence of a permanent teleportation mechanism linking Earth and Mars, and for the existence of functioning bases of the US government on Mars.

Norwegian Space Centre: Earth and Mars

According to Mr. Basiago, the US government has had a fully operational teleportation capability since 1967-68, and by 1969-70, was already training a cadre of gifted and talented American schoolchildren, including himself, to become America’s first generation of “chrononauts” or time-space explorers.

This training, he said, culminated in 1981, when, as a 19-year-old, he teleported to Mars, first by himself after being prepared for the trip by CIA officer Courtney M. Hunt, and then a second time in the company of Hunt. Both trips, Mr. Basiago said, were made via a “jump room” located at a CIA facility in El Segundo, CA. The apparent purpose of the trips to Mars was to familiarize him with Mars because the CIA knew of his destiny as the discoverer of life on Mars and deemed it important that he visit Mars and experience it first-hand.

Mr. Basiago’s involvement in US time-space research as a child, as well as Courtney M. Hunt’s identity as a CIA officer, have been confirmed by Dr. Jean Maria Arrigo, an ethicist who works closely with US military and intelligence agencies, and by US Army Captain Ernest Garcia, whose storied career in US intelligence included both serving as a guard on the Dead Sea Scroll expeditions of Israeli archaeologist Yigal Yadin and as the Army security attaché to DARPA’s Project Pegasus.

Arthur Neumann has stated that he teleported to Mars in order to participate in an project meeting there at which Martian extraterrestrials were present. Mr. Basiago has publicly stated that he and his father briefly met three Martian astronauts at a US defense contractor location while the Martians were there on a liaison visit from Mars.

These independent whistleblower statements, in turn, provide a threshold of corroborative evidence that an intelligent civilization lives under the surface of Mars, and that this civilization is involved in on-going secret liaison programs with agencies of the US government, including the CIA.

There were seven times in his life when the CIA informed Mr. Basiago about some aspect of his future Mars work.

Five of the episodes were informational briefings in which aspects of his future landmark paper [The Discovery of Life](#) on Mars (2008), establishing the existence of life forms on the ecologically fragile surface of Mars, were revealed to him.

The other two episodes – the meeting with the Martian astronauts at Curtiss-Wright in 1970 and his two trips to Mars in 1981 – were practical exercises in which Mr. Basiago’s future role in making public the existence of a strategic relationship between the US government and the Martian civilization seems to have been the purpose.

The seven briefings apparently resulted from a finding by the CIA, made some time around 1967-68, that Mr. Basiago’s future Mars writings were of international security significance. According to Basiago, when the CIA asked him to teleport to Mars in 1981, he was told that he had to go to Mars but not told why he had to go.

Mr. Basiago told the Examiner:

“When I asked Courtney M. Hunt why I had to teleport to Mars, he said, ‘Because the survival of the human race depends on it.’ At this point, we can only guess at what my CIA contact knew. I wish I knew.

“Clearly, I was qualified to teleport to Mars because I had teleported back and forth between New Jersey and New Mexico as one of the children attached to Project Pegasus. But the broader reason why I had to teleport to Mars remains a mystery.

“Maybe it involved the normalization of relations between Earth and Mars pertaining to an extraterrestrial defense posture that was then being established. Maybe it was something as basic as the fact that they knew that my discovery of life on Mars would inspire the next generation of Americans to become astronauts and space scientists.

“All I know is that it was a journey to Mars that the CIA had determined that I absolutely had to make and that I could not decline. Today, I’m glad that I went to Mars, because it gave me an understanding of what Mars is like, and this understanding informs the works of natural history that I am currently writing about life on Mars.”

Mr. Basiago’s paper heralding his discovery of life forms on Mars, together with approximately 40 other research monographs that he has written proving that Mars is an inhabited planet, can be accessed at www.exopolitics.com by clicking [here](#).

Arthur Neumann is a Project Camelot witness.

Andrew D. Basiago is the founder and president of the [Mars Anomaly Research Society \(MARS\)](#), which is working for public recognition of the existence of life on Mars and a new international law and policy regime pertaining to it.

Web Bot predicted Whistleblower on Mars Life and Time Travel

10-11-2009^{rint}

Web Bot: Andrew Basiago is predicted "planetary level" whistleblower for Mars life and time travel

By Alfred Labremont Webre
November 9, 2009

A [September 15, 2009 report](#) using Asymmetric Language Trend Analysis (ALTA) of data collected by the Web Bot predicts that "It is very likely that the 'whistleblower' who had been described in previous ALTA reports (see 1309) as emerging out of the period of the [coagulation] of the [government/officialdom of the USofA due to financial structure collapse] is a person by the name of [\[Andrew D. Basiago\]](#)."

Clif High, administrator of the [Web Bot](#) and author of the ALTA report, states that the truth campaign of American whistle blower Andrew D. Basiago will raise Mr. Basiago's public profile "to a very high level within the mainstream media and that such presence in the media will climb over the next 9/nine months to a planetary level."

Basiago published a paper entitled [The Discovery of Life on Mars](#) on December 12, 2008 that contains photographic evidence and textual analysis of humanoid beings, animal species, carved statues, and built structures on Mars. These were derived from images taken by NASA's Mars Exploration Rover Spirit on the surface of Mars. His paper, which achieves over 50 "firsts" in science, is the first work to prove that Mars not only harbored life in ancient times but is an inhabited planet today.

Referring to his paper, the ALTA report states "The past forecast for this person who would make a [planetary impact] of such magnitude that [a second wave] of other [whistle-blowers] of all kinds would be drawn into the public view includes descriptors and archetypes that are currently being fulfilled by reports about Andrew's paper."

The ALTA report also states, "[T]he linguistics both around Andrew D. Basiago and by him reach to almost 34/thirty-four percent of the predicted linguistic set (actually quite significant levels when attempting to match personality to forecast at this early a stage)."

The methodology of Web Bot and ALTA reports

The [Web Bot project](#) on which the ALTA reports are based uses software to "search the Internet for about 300,000 keywords with emotional context and record the preceding and following words to create a 'snapshot'. Through this, the technology is claimed to be able to examine the collective unconscious of the world as a whole. It is thus said to be able to predict catastrophic [and other] events 60 to 90 days in advance." The Web Bot is claimed to have accurately predicted the September 11, 2001 terror attacks in June 2001, as well as the blackout of the Northeastern United States in 2003. The project was unsuccessful in predicting a Vancouver, B.C. and Pacific Northwest earthquake for December 12, 2008.

Russian television reports Basiago's discovery

A recent interview by reporter Daria Okuneva of TVC-Moscow is illustrative of the planetary media coverage that is beginning to be accorded Andrew D. Basiago's discovery of life on Mars. TVC-Moscow is a state-run Russian TV station with the fourth-largest coverage area in Russia.

Daria Okuneva, TVC - Moscow: What have you found in NASA's photographs from Mars?

Andrew D. Basiago, President, Mars Anomaly Research Society (MARS): First, I have found abundant evidence of humanoid beings of two types on Mars, one closely resembling modern human beings on Earth and the other the Grays of the UFO contact literature.

Second, I have found animal species, including animals that presently exist on Earth, that once existed on Earth but are now extinct, and that have never existed on Earth.

Third, I have found many carved statues, especially large heads and faces of humans and animals made from indigenous rocks, which is a distinctively Martian art form, as exemplified by The Face on Mars at Cydonia.

Fourth, I have found built structures, including aqueducts and buildings.

Fifth, I have found dead bodies, including a large mass of dead humanoids littering the arroyo immediately west of the Home Plate Plateau in the Columbia Basin of the Gusev Crater of Mars.

Lastly, and most intriguingly, I have found evidence of both large monuments and small rock carvings establishing the connection between Ancient Egypt and Ancient Mars.

Okuneva: Does this evidence establish the existence of a previous civilization on Mars?

Basiago: Yes. Mars was inhabited in antiquity and is inhabited today. The civilization on Mars was impacted by the solar system catastrophe of 9,500 BC, in which debris elements from the Vela supernova explosion entered our solar system, devastating Mars and destroying the great maritime civilization on Earth that built the Great Pyramid and the Sphinx.

The evidence on Mars of this ancient civilization consists of very large monuments that can be seen from satellite images and now smaller details photographed by NASA's rovers Spirit and Opportunity, such as the image of an Egyptian pharaoh that MARS has identified on a rock on Mars that was photographed by Spirit, that we are calling "The Rosetta Stone of Mars" because it establishes the connection between Ancient Egypt and Mars.

After this catastrophe, the human beings on Mars took refuge underground, where their post-catastrophe civilization has survived intact, and where, according to a senior CIA officer who contacted me after I published *The Discovery of Life on Mars* in 2008, one million Martian humanoids of several different types now live.

Okuneva: Is there any evidence of forests and water existing on Mars?

Basiago: In my opinion, yes. Although the ecology of Mars is fragile and even tenuous by earthly standards, there is evidence that both forests and water presently exist on Mars.

Several years ago, the late Dr. Thomas Van Flandern, the former chief astronomer of the US Navy, published photographs showing "possible trees" on Mars. He concluded that they were "ancient forests remains," that is to say, fossils.

He also studied The Face on Mars at Cydonia, and concluded that the probability that it is a built structure is astronomically high - "a thousand billion billion to one."

He determined, however, that such evidence was from a civilization that died out on Mars 3.2 million years ago, when life was beginning on Earth. Dr. Van Flandern concluded that Mars is a dead planet. I disagree.

My analysis of NASA image PIA10214 in 2008 proved that Mars is inhabited today by humanoid beings and by many different animal species.

Mars' biota also includes plant life that we would liken to the algae, lichen, mosses, ferns, and sedges that we find here on Earth.

As for the presence of water on Mars, I would cite the fact that in 2008, at the very time that NASA was announcing its "chilling discovery" of ice on Mars, I published data derived from NASA's own photographs showing evidence of both standing water and flowing water in the West Valley of the Columbia Basin of the Gusev Crater of Mars, which is in the middle latitudes of the Northern Hemisphere of Mars, about where Columbus, Ohio is here on Earth.

In NASA image PIA10214, a lake, azure blue in color, can be seen at the foot of Husband Hill, to the west of the Home Plate Plateau. In NASA image PIA11049, a pipe can be seen, and from it, water can be seen flowing downward into a catch basin, around which, in turn, human beings can be seen standing, to the south of the Home Plate Plateau.

Such evidence shows that NASA is attempting to conceal the obvious evidence of life that exists in its own photographs, which is contrary to the mission that the US space agency was given by the US Congress in the NASA Act of 1958, which was to foster "the expansion of human knowledge of... space." It is trying to do so by making periodic announcements of discoveries on Mars of a de minimis nature, most recently, the discovery of methane. Surely, the people of this planet have a right to know that the planet that every two years comes closest to our planet, Mars, is an inhabited planet, and, in this way, to know and understand the true natural history of the solar system that we live in as inhabitants of this planet.

Okuneva: What is the probability that all of these forms of evidence are optical illusions?

Basiago: None. I am a lawyer in Washington State, and I can say with some authority that the evidence that MARS has already published on the Web is sufficient to convince any jury in the United States that Mars is an inhabited planet.

However, we are not at that place in the debate. Where we are at in the debate is whether President Obama will honor his own call for "Change" and change the traditional policy of the US government, established by the CIA's Robertson Panel of 1952-53, which has been to deny the existence of extraterrestrial life.

You may remember that during the presidential campaign in 2008, President Obama was asked about extraterrestrial life and he joked that the critical question was whether or not the ET's were Democrats or Republicans! I met Barack Obama in 1982 when we were college students, and I think that he is smarter than that. I think that he recognizes the great contribution that he could make as president were he to embrace my call to acknowledge that Mars is inhabited, establish a Mars protectorate under the UN, and normalize relations with the human civilization on Mars. Ultimately, I think that he has no other choice, now that the evidence that Mars is inhabited so far surpasses the possibility that it is an optical illusion that it falls somewhere between the "substantial evidence" standard and the "beyond a reasonable doubt" standard. Clearly, there is still some skepticism, but in my view such skepticism results from fear of change rather than the courage to confront the truth.

Okuneva: If the artifacts truly exist, what lessons should be learned by humanity about your discovery of life on Mars?

Basiago: The overarching philosophical lesson to be learned from this new discovery is that we live in an inhabited Universe and that human life as we know it on Earth might be more commonplace in the Cosmos than we once thought. The 21st Century will see something that human civilization on Earth has not seen for 500 years - the discovery of a new world.

The immediate lesson to be learned, however, and the reason that I am leading the campaign to achieve political recognition that Mars is an inhabited planet, is that we must begin the great debate on Earth to enact the international treaty that is now required to protect the ecology and the civilization of Mars from visitation, exploration, habitation, and colonization by human beings from

Earth. We must remember that Mars does not belong to the people of America or of Russia or, indeed, the people of Earth. Mars belongs to the Martians! If we fail to recognize this, then we will fail our first major test of cosmic citizenship. I think that the people of the Earth are ready for cosmic citizenship and I think that they are also ready for the truth.

Ed. Note: Mr. Basiago's paper [The Discovery of Life on Mars](#) can be accessed at www.exopolitics.com by clicking [here](#).

Basiago reveals US government's "quantum access" capability

What is fascinating about the determination made by Mr. High is that Mr. Basiago's high level (34%) in the linguistic set predicted by the ALTA model might be caused by revelations of his other than those pertaining to life on Mars. On August 31, 2009, in a six-hour interview by Jessica Schab that has become a YouTube classic, Mr. Basiago disclosed the existence of a secret US time travel program called Project Pegasus.

In the interview, Basiago states that the US government's "quantum access" capability was so advanced 40 years ago that in 1971, he was asked to read a copy of his paper *The Discovery of Life on Mars* that had been retrieved from the future, so that when he wrote it, in 2008, it would contain as much data about Mars as possible. This interview, in which Mr. Basiago explains the connections between his childhood involvement in Project Pegasus and later Mars findings, can be viewed below.

Project Pegasus was a classified, defense-related research and development program launched by the US Defense Advanced Research Projects Agency (DARPA) in the late 1960's. In the You Tube interview with Ms. Schab, Mr. Basiago "relates his experiences in DARPA's Project Pegasus during the period 1969 to 1972, and describes probes to past and future events that he took via teleportation and chronovision during the early days of time-space exploration by the US government."

According to Mr. Basiago, the US government already had a fully operational teleportation capability in 1967-68, and by 1969-70, was actively training a cadre of gifted and talented American schoolchildren, including himself, to become America's first generation of "chrononauts" or time-space explorers.

This training, he said, culminated in 1981, when, as a 19-year-old, he teleported to Mars, first by himself after being prepared for the trip by CIA officer Courtney M. Hunt, and then a second time in the company of Hunt. Both trips, Mr. Basiago said, were made via a "jump room" located at a CIA facility in El Segundo, CA. The apparent purpose of the trips to Mars was to familiarize him with Mars because the CIA knew of his destiny pertaining to publicly establishing the fact that Mars is an inhabited planet and deemed it important that he visit Mars and experience its conditions first-hand.

Mr. Basiago's involvement in advanced US time-space research as a child, as well as Courtney M. Hunt's identity as a career CIA officer, have been confirmed by Dr. Jean Maria Arrigo, an ethicist who works closely with US military and intelligence agencies, and by US Army Captain Ernest Garcia, whose storied career in US intelligence included both serving as a guard on the Dead Sea Scroll expeditions of Israeli archaeologist Yigal Yadin and as the Army security attaché to Project Pegasus.

Remote sensing in the time-space continuum

Mr. Basiago has revealed that between 1969 and 1972, as a child participant in Project Pegasus, he both viewed past and future events through a device known as a chronovisor and teleported back and forth across the country in vortal tunnels opened in time-space via Tesla-based teleporters located at the Curtiss-Wright Aeronautical Company facility in Wood Ridge, NJ and the Sandia National Laboratory in Sandia, NM.

DARPA had, he explains, five reasons for involving American school children in such new, dangerous, and experimental activities. First, the Department of Defense wanted to test the mental and physical effects of teleportation on children. Second, Project Pegasus needed to use children because the holograms created by the chronovisors would collapse when adults stood within them. Third, the children were tabula rasa and would tend to see things during the time probes that adults would tend to miss. Fourth, the children were trainees who upon growing up would serve in a covert time-space program under DARPA that would operate in tandem with the overt space program under NASA. Lastly, the program sponsors found that after moving between time lines, adult time travelers were often becoming insane, and it was hoped that by working with gifted and talented children from childhood, the US government might create an adult cadre of "chrononauts" capable of dealing with the psychological effects of time travel.

In one time probe to the future undertaken by Project Pegasus from a chronovisor device located at ITT Defense Communications in Nutley, NJ, Mr. Basiago viewed the US Supreme Court building in Washington, DC as it would be in the year 2013. During this probe, he found that the Supreme Court building was under 100 feet of stagnant water and reported this to the Lieutenant Commander from the Office of Naval Intelligence who debriefed him after the probe to the future was completed. He hastens to add that because the chronovisors did not identify absolute, deterministic futures but rather alternate futures in the "multi-verse," this catastrophic vision of Washington, DC might be from an alternative time line that does not materialize on our time line.

In contrast to the chronovisor probes, in which a form of virtual time travel was achieved, the teleporters developed by Project Pegasus allowed for physical teleportation to distant locations, sometimes with an adjustment forward or backward in time of days, weeks, months, or years. According to Mr. Basiago, by 1972, the US government was using "quantum displacement" of this kind to both send people forward in time several years to store sensitive military secrets in the future and backward in time several years to provide the government current intelligence about future events.

Societal impact of chronovision and teleportation

Andrew D. Basiago's Pegasus revelations establish that a secret, advanced US time-space program emerged 40 years ago. For four decades, this program has used esoteric technologies involving chronovision and teleportation to perform "remote sensing in time" of past and future events. For the past three decades, teleportation has also been used to send individuals from Earth to strategic US bases on Mars. He is adamant that these technologies be revealed so that their positive and negative aspects can be debated and their positive aspects used to advantage humanity.

Chronovision, he said, could be used to create an international network of virtual museums in which images from the past would be shown to enlighten and educate the public. Misapplied, such technology could also be used to create a Fascist society based on 24-hour surveillance of individuals by government, which may have been portended by the DARPA project called "Total

Information Awareness" that President George W. Bush established and placed under Admiral John Poindexter.

Teleportation is a second quantum access technology developed with public funds that the public is being denied the full benefits of. Teleportation could be used, Basiago said, to move people and goods more quickly and efficiently around the globe, without the pollution caused by planes, trains, and automobiles or the negative land use effects from airports, railroad tracks, and highways. Yet, if it is not declassified, teleportation will remain what it has been for 40 years, that is, a weapon for use only by the US military, to have the option to put troops precisely where they are needed on battlefields.

"I take my responsibilities as a planetary whistle blower very seriously," Basiago said. "This is a truth campaign for positive human development on this planet. The people of this planet have a right to a true telling of the natural history of the solar system that we inhabit. This includes the truth that Mars is an inhabited planet and also that the United States' secret space program has already sent individuals from this planet to the Red Planet. If we are to achieve a sustainable human future on this planet, we must demand that the US government reveal the teleportation that has been used to reach Mars so that it can now be used to revolutionize human transport on Earth. The people of this planet have a right to inhabit a future global society in which all human beings enjoy the life-advantaging benefits of all of the technologies that all of human ingenuity has ever produced. In both of these cases, whether a treaty protecting Mars or a global network of teleports results, the truth shall set us free."

PART 5 <http://www.youtube.com/watch?v=qobG8x0-5os&NR=1> GREAT PYRAMID CONNECTED TO MARS - NEFERITTI WAS THE ROYAL CONSORT OF PHAROAH AKHENATEN - THE SURFACE IS LITTERED WITH BLUE TURQUOISE AND GREEN STONES - AND A HEADRESS JUST LIKE NEFERITTI WAS FOUND ON MARS - THINKS THAT NEFERITTI AND AKHENATEN WERE ONCE ON MARS THEMSELVES

PART 6 <http://www.youtube.com/watch?v=w0-HOIqcr7E&NR=1> BARACK OBAMA KNEW WHEN HE WAS 21 YEARS OLD THAT HE WAS BEING GROOMED TO BE PRESIDENT OF THE UNITED STATES

PART 7 <http://www.youtube.com/watch?v=pHIH8YLw9QE&NR=1> THROUGH TIME TRAVEL YOU CAN KNOW THE FUTURE FOR CERTAIN - THEY'VE BEEN DOING THIS FOR 40 YEARS - HE'S BEEN AS FAR OUT AS 2045 -

PART 8 http://www.youtube.com/watch?v=Nm3VAS_T3bM&NR=1 THEY WERE TORTURED AND MIND CONTROLLED DURING PROJECT PEGASUS - HE TRIED TO FOIL THE PROJECT BECAUSE OF HIS TREATMENT

THE ELEVATOR IS THE TELEPORT TO MARS

PART 9 <http://www.youtube.com/watch?v=aXWLPCA8rvU&NR=1> THE WHOLE ROOM GOES THERE - THE SKULL-LIKE HEADS ON MARS - THE EYE SOCKETS ARE THE ENTRANCES TO THE UNDERGROUND BUNKERS - THE AIR ON MARS IS HOT AND LIKE HIGH ALTITUDE - BUT FEELS LIKE SMOGGY LOS ANGELES

PART 10 <http://www.youtube.com/watch?v=olVWQ1lu-sk&NR=1> HOUSES ON MARS LOOK LIKE ADOBE BRICK - DESCRIBES CREATURES/MEN ON MARS - NOT PLEASANT TO HEAR

PART 11 <http://www.youtube.com/watch?v=KwOz9VvzHAU&NR=1> THERE ARE REPTOIDS ON MARS - THEY EAT HUMANS BOTH ALIVE AND DEAD - DAVID WILCOCK SAYS THAT WE HAVE 600,000 HUMANS UP THERE.

THERE ARE PREDATOR SPECIES ALIVE ON MARS AND THEY ARE DANGEROUS TO MEET - SIMILAR TO SCORPIONS

PART 12 <http://www.youtube.com/watch?v=cASH3BBuM9c&NR=1> MARTIANS HAVE LARGE BALD HEADS -

PART 13 http://www.youtube.com/watch?v=HcHb_EcKkCg&NR=1 NASA HAS PHOTOS OF THESE MARTIANS

PART 14 <http://www.youtube.com/watch?v=SPF2PFmwwuo&NR=1> SEEING IS A MATTER OF PERCEPTION - SEEING LIFE ON MARS CANNOT SEE IT BECAUSE THEY'VE NEVER SEEN IT BEFORE - LIKE THE MAYANS COULDN'T SEE THE SHIPS OFF THE COAST OF GUATEMALA WHEN THE SPANISH ARRIVED.

PART 15 http://www.youtube.com/watch?v=EExFykfkTIE&feature=channel_page JESUS SAID - "IN MY FATHER'S HOUSE ARE MANY MANSIONS IN IT" BARBARA HAND CLOW WROTE ABOUT CATASTROPHOBIA. OUR CIVILIZATION HAS ITS HEADQUARTERS IN CAIRO AND CAIRO MEANS MARS - 11,500 YEARS AGO THERE WAS A GREAT CATASTROPHE AND CIVILIZATION HAD TO START OVER FROM SCRATCH. THAT'S WHY PEOPLE ARE AFRAID OF MARS. IT IS NORMAL FOR LITTLE CHILDREN TO REMEMBER THEIR PAST-LIVES, BUT AS THEY GET OLDER THEY START TO FORGET. I REMEMBER WALKING THROUGH CAVE-LIKE ROOMS UNDER THE MARS SURFACE. A WOMAN FROM DARPA CONTACTED ME AND SAID THERE ARE ABOUT A MILLION HUMANOIDS ON MARS RIGHT NOW. SOME ARE SOME HUMANOID NINJA TURTLES.

PART 16 <http://www.youtube.com/watch?v=VLpK1ycTjv0&NR=1> THERE ARE MORE COINCIDENCES BETWEEN THE LINCOLN/KENNEDY PRESIDENCIES THAN HAVE BEEN PUBLISHED. HOWEVER, HE DOESN'T BELIEVE THIS HAS ANYTHING TO DO WITH QUANTUM ACCESS TECHNOLOGY, ONLY THEIR SPIRITUAL KINDRED. QUANTUM ACCESS HAS PROVED THAT THE PAST AND FUTURE ARE MULTIDIMENSIONAL AND HAVE MULTI TIMELINES.

PART 17 <http://www.youtube.com/watch?v=6eFIack8nsk&NR=1> SPECULATION IS THAT THESE CREATURES ON MARS MIGHT BE LIKE THOSE ON ATLANTIS, OR LIKE SOME THAT MIGHT BE HYBRIDS OF CREATURES FROM EXPERIMENTS AT DULCE, NEW MEXICO. MARS CIVILIZATION IS UNDERGROUND. ANIMALS ON MARS ARE SUCH AS ELEPHANTS, PLATYPUS WITH BABIES NURSING, HORSES, COWS, FROGS, TURTLES, VERY LARGE SNAKES 40 FEET LONG - SLUGS, SNAILS. THERE IS NO EVIDENCE AS TO HOW THEY ARE SURVIVING, EXCEPT PREDATION OF EACH OTHER.

PART 18 <http://www.youtube.com/watch?v=99sycNu0gio&NR=1> HE WAS ON MARS IN 1981. HE DID MEET A CREATURE THAT

TRIED TO ATTACK HIM BEFORE HE FLED BACK INTO THE SKULL EYES BACK DOWN INTO THE UNDERGROUND TUNNEL. SOME ANIMALS ARE COMBINATION OF HUMANS HANDS OR FEET COMBINED WITH REPTILE OR GRUB-LIKE WITH A HUMAN HEAD. THESE ANIMALS DIDN'T SPEAK LIKE HUMANS, BUT BARKED AND GRUNTED LIKE ANIMALS. THERE WAS A SCORPION MAN. HUMAN ARACHNID TYPE CREATURES. AS FOR THE HUMANS, THEY ARE DEFINITELY IN LIASON WITH OUR DEFENSE DEPARATMENT ON EARTH.

PART 19 <http://www.youtube.com/watch?v=Xl5nrLc7a8Q&NR=1> IN AMERICA, HE MET THREE MARTIANS AT CURTIS WRIGHT BASE WHO TOOK OFF IN A UFO THAT WENT OUT INTO SPACE FASTER THAN ANY PLANE WE HAD IN 1970. THEY COULD BE REMANT SPECIES FROM PRIOR TO THE CATASTROPHE 11,500 YEARS AGO. THEY MIGHT ALSO BE DOING GENETIC ENGINEERING ON MARS BECAUSE THESE SPECIES ARE QUARANTINED FROM REGULAR POPULATIONS. OR THEY COULD HAVE DEVELOPED NATURALLY FROM RAPID MUTATIONS FROM THE CATASTROPHE. OR THEY COULD BE RELEASES FOR EXPERIMENTS FROM DULCE IN THE ARCHULETA MESA. HE MET A HUMAN BEING ON MARS WHO WAS IN EXTREMELY ADRENAL EXHAUSTION, RUDDY COMPLEXIONS, GREASY HAIR 2 WEEKS OF BEARD GROWTH, STINKY LIKE HE NEEDED A BATH. HE LIVED ALONE IN A SMALL ADOBE HUT AND WHEN HE WENT INTO THE HOVEL, THE SCREEN DOOR FELL RIGHT OFF THE HINGES..

PART 20 <http://www.youtube.com/watch?v=uvbjohPFAC0&NR=1> QUANTUM ACCESS - REMOTE VIEWING, TELEPORTING TO THE FUTURE, SPINNING TO OBE, THE MONTAUK CHAIR - CHRONOVISION - see above photo - from Nicola Tesla - (Tesla's papers were forwarded to scientists at Los Alamos)

PART 21 <http://www.youtube.com/watch?v=xQskUx20MeM&NR=1> DESCRIBES WHAT YOU SEE WHEN GOING THROUGH THE TUNNEL.

PART 22 <http://www.youtube.com/watch?v=fdRTvHoN7Vk&NR=1> ENRICO FIRMI, LOS ALAMOS, HAROLD AGNEW, CHRONOVISOR - FIELD OF OSUPERCHARGED PARTICLES - SHOWS LIGHT FROM A PAST OR FUTURE EVENT - IF YOU STAND IN THE HOLOGRAM, YOU EXPERIENCE IT YOURSELF - THE LOOKING GLASS TECHNOLOGY - THERE WAS GREAT ALARM THAT IT SHOULD BE KEPT SECRET BECAUSE OF LACK OF PRIVACY - YOU COULD EVEN LOOK AT AT SOMEONE GOING TO THE BATHROOM.

GREGORIAN CHANTS HAVE SPECIAL PROPERTIES THAT HELP PEOPLE SEE SPIRITUAL EVENTS

PART 23 <http://www.youtube.com/watch?v=zRc9WqUoo8&NR=1> HE WAS GIVEN DRUGS TO MAKE HIM FORGET WHAT HE SPENT ALL DAY LEARNING AT THE LEARNING LAB AS A KID. THEY LEARNED TO PLAY 'CONCENTRATION - WHICH PROVES PSYCHIC ABILITIES.

PART 24 <http://www.youtube.com/watch?v=Dqao4k-93nl&NR=1> IN THE TELEPORT MACHINE YOU FEEL LIKE YOU ARE MOVING FORWARD BUT FALLING FORWARD AT THE SAME TIME - BILL RICHARDSON WHO BECAME GOVERNOR WAS ONE OF THE GREETERS WHEN THEY GOT TO THE END OF THERE TELEPORT JOURNEY - HE WAS ABOUT 25 AT THE TIME. THIS WAS IN SANTE FE NEW MEXICO. THEY USED KIDS BECAUSE THERE WASN'T ENOUGH OXYGEN IN THE DEVICE TO KEEP AN ADULT ALIVE. THE FIRST CHILDREN WERE FROM MEXICO - AS GUINEA PIGS - WHEN THEY SURVIVED, THEY MOVED ON TO AMERICAN KIDS.

PART 25 - <http://www.youtube.com/watch?v=nXKDvKbwFJw&NR=1> THE FIRST CHILD TELEPORTEES IN THE EARLY 1970S WERE FROM LATIN AMERICA. ONE CHILD LOST HIS FEET BECAUSE HE MOVED WHILE HE WAS IN THE TELEPORT MACHINE.

PART 26 <http://www.youtube.com/watch?v=Xu5WRtnrCs4&NR=1> IF YOU WATCH THE SAME SCENE MORE THAN ONCE - YOU DON'T SEE THE SAME THING IDENTICALLY - IT CHANGES A BIT EACH TIME - HE WENT TO SEE LINCOLN GET SHOT EACH TIME, SOMETHING DIFFERENT HAPPENED - WHICH PROVES DIFFERENT TIMELINES ARE OCCURRING.

PART 27 <http://www.youtube.com/watch?v=Xu5WRtnrCs4&NR=1> AN EVENT IS ALWAYS PERSON DEPENDENT - SO AN EVENT IS ALWAYS DIFFERENT DEPENDING ON WHAT THE INDIVIDUALS DO -

PART 28 <http://www.youtube.com/watch?v=8WL1QzCxS34&NR=1>

PART 29 <http://www.youtube.com/watch?v=QKRYtc-IN7I&NR=1> HE WENT TO A CIVIL WAR BATTLE - HE WAS QUESTIONED BY ONE OF SOLDIERS THERE - HE WAS ONLY THERE IN A SPECTRAL VISION - PEOPLE FROM THE SIDE WERE CHEERING - EVEN WHILE THERE WAS SHOOTING GOING ON. IT GOT TOO DANGEROUS FOR PEOPLE IN THE PHYSICAL WORLD AT THE SAME TIME SO THEY STOPPED DOING THAT.

PART 30 <http://www.youtube.com/watch?v=VTnGHxt1m2U&NR=1> THEY ONLY SENT THE KIDS TO TIMELINES WHERE THEY WOULDN'T GET KILLED BY PREDATORS - PARTICULARLY IN THE TIME OF THE DINOSAURS

PART 31 http://www.youtube.com/watch?v=-p6_qNzj2PQ&NR=1 HIS FATHER DIDN'T KNOW THAT HE WAS GOING TO BE PART OF PROJECT PEGASUS UNTIL HIS FATHER SAW HIM AS A TIME TRAVELER TO GETTYSBURG SPEECH OF ABRAHAM LINCOLN. IN 1951 A PHOTO WAS PUBLISHED OF THE GETTYSBURG ADDRESS AND HIS PHOTO WAS IN IT? HOW WAS THAT POSSIBLE? IN 2045 - HE SAW A BEAUTIFUL GREEN GLASS BUILDING BEING BUILT. THERE WAS A PORTAL OF DENSE BLUE LIGHT AND ENDED UP IN 2045. IT ONLY TOOK A COUPLE SECONDS. HE SAW A GARDEN SUBURB - VERY OPULENT - NO CARS, NO POLLUTION, VERY BEAUTIFUL LANDSCAPED. PEOPLE WERE RIDING ON SEDGEWAYS - JUST INVENTED RECENTLY - IT WAS LIKE A COLLEGE CAMPUS. IT WAS CLEARLY A SUSTAINABLE SOCIETY. PEOPLE'S CLOTHING WAS MORE STAR-TREKKY BUT STILL NOT TOO FAR OFF OF WHAT WE WEAR NOW. EVERYONE WAS TALL AND ATTRACTIVE. ONE WOMAN WAS CAUCASIAN AND ONE WAS LIGHT SKINNED AFRICAN AMERICAN. THEY KNEW WHO HE WAS BECAUSE THEY KNEW OF HIS PROJECT.

PART 32 <http://www.youtube.com/watch?v=LQUfPYmG4k&NR=1> THEY PURPOSELY DID NOT PHYSICALLY GO TO A PLACE WHERE THEY TELEPORTED TO.

PART 33 http://www.youtube.com/watch?v=9Ymb_X370JQ&NR=1 HE PLAYED A TRICK ON HIS MOTHER WHEN HE CALLED HIS MOTHER FROM NEW MEXICO AND WHEN SHE GOT THE PHONE CALL HE WAS ACTUALLY IN THE HOUSE WITH HER. I CAN'T FIGURE OUT HOW THEY DID THAT. WHEN HE WENT TO THE YEAR 2013 - HIS FATHER WASN'T WITH HIM WHEN HE WAS EXPECTED TO BE THERE.

PART 34 <http://www.youtube.com/watch?v=ddqlc8fftc&NR=1> I DON'T KNOW IF THEY LIED TO HIM, BUT WE KNOW THAT HIS FATHER DIED IN THE LAST COUPLE YEARS. THE TARGET OF THIS TRIP WAS THE SUPREME COURT BUILDING - AND IN 2013 IT WAS UNDER WATER. (DONALD RUMSFELD WITH THE LEADER OF THIS PARTICULAR TRIP) HE DOES NOT BELIEVE THIS EVENT HAS TO HAPPEN. HE THINKS THE FUTURE IS MALLEABLE DEPENDING ON PEOPLE'S HOPES AND FEARS SO PEOPLE SHOULD THINK POSITIVE AND NOT NEGATIVE.

PART 35 http://www.youtube.com/watch?v=-_g2kEeWG8w&NR=1 THEY WERE DOING TESLA BASED TECHNOLOGY - NOT THE TYPE OF STAR TREK TYPE DISINTEGRATION AND REINTEGRATION TYPE OF TECHNOLOGY. THE STAR TREK TYPE TECHNOLOGY WOULD KILL A PERSON AND THE CELLS CAN'T BE REASSEMBLED ON THE OTHER END. THE GOVERNMENT WASTES A LOT OF TIME AND MONEY THAT IS ALREADY INVENTED AND ITS IMMORAL NOT TO ADMIT WHAT WE ALREADY HAVE. DISCLOSURE IS RELIEVING HUMANITY FROM METAPHYSICAL BONDAGE.

PART 36 <http://www.youtube.com/watch?v=InkBY9UWmGy&NR=1> ONE PERSON OR A SMALL GROUP CAN TAKE DOWN THE GOVERNMENT IF THEY KNOW THE TRUTH. WE ARE IN METAPHYSICAL BONDAGE TO ARCHAIC TECHNOLOGY. THAT METAPHYSICAL BONDAGE KEEPS US IN PHYSICAL BONDAGE. WE KNOW THAT TESLA WAS IN CONTACT WITH EXTRATERRESTRIALS AND WAS ESSENTIALLY A VERY INTELLIGENT PERSON, AND HAD SOMETHING SPECIAL ABOUT HIM THAT ALLOWED HIM TO SEE ENERGY. HE WAS A GENIUS AND PERHAPS EVEN A IDIOT SAVANT OF SOME TYPE.

PART 37 - <http://www.youtube.com/watch?v=xQUzvtHPXeA&NR=1> IF AFTER DISCOVERING WHO IS THE PRESIDENT IN THE

FUTURE IDENTIFIES THE PERSON AND THEN TRAINS THE INDIVIDUAL TO CREATE THE FUTURE THEY WAY YOU WANT IT TO BE IN THE FUTURE. BOTH GEORGE BUSHES, CLINTON, AND OBAMA WERE KNOWN TO BE PRESIDENT IN THE FUTURE AND COACHED BY THE CIA AND OTHERS TO MAKE SURE THEY DID WHAT WAS WANTED OF THEM. RUMSFELD AND RICHARDSON WERE BOTH INVOLVED IN THAT.

PART 38 <http://www.youtube.com/watch?v=OYHT8VnKzyM&NR=1> THERE IS GREAT DANGER OF A SMALL GROUP OF INSIDERS TO USE THIS TECHNOLOGY TO SEE THE FUTURE AND HOLD POWER IN THAT WAY. PEOPLE HAVE A HUNGER FOR TRUTH AND KNOW THAT THE GOVERNMENT HAS BEEN LYING TO THEM.

PART 39 <http://www.youtube.com/watch?v=S7Soeea3mnU&NR=1>

[www.VeritasShow.com / The Veritas Show with Mel Fabregas: Andrew Basiago](#)

This is an explosive interview with **Andrew D. Basiago** - The Discovery of Life on Mars. This brave whistleblower recounts his experiences

[VeritasShow](#)

Appearing during all 4 hours of the show, attorney [Andrew D. Basiago](#) discussed his experiences within a secret DARPA program-- "Project Pegasus," and what he claimed to be the true history of U.S. time travel research and teleportation technology. As a child, he said his father volunteered him to be inducted into the experimental program, as a "trainee/guinea pig" from the years 1969 to 1972. He described being teleported from a location in Woodbridge, NJ to Santa Fe, NM via a device derived from Tesla technology. A "cavern" opens up into the fabric of time-space that is wrapped around the "teleportees" as they are repositioned to a new location, he explained, adding that it's more like the TV show Sliders than the teleporters on Star Trek.

During this time frame, he said he witnessed an accident in which a boy's feet were sheared off after he was teleported. He also talked about how the teleportation technology could be used for time travel, and the development of "chronovisors" which allowed holographic recordings to be made of historically significant events such as the crucifixion of Jesus, and the signing of the US

Constitution. In one chronovisor recording of the future he was able to witness in 1971, he described seeing the US Supreme Court building under 100 ft. of brackish water in the year 2013, suggesting that the entire Eastern seaboard will be flooded.

Time travel technology enabled the US to win the Cold War, as the government teleported military secrets into the future, to store for safekeeping, he detailed. The technology was also used to brief US Presidents like Clinton, the Bushes, and Obama about their destiny, years before they became President, Basiago claimed. He also asserted that Donald Rumsfeld and Gov. Bill Richardson both served in Project Pegasus, and he invited them to come forward with the truth.

Guest: MICHAEL BELFIORE

Hosted by: GEORGE KNAPP

Date: Sunday, November 8, 2009

SHOW FLASH: GEORGE KNAPP is joined by space and technology writer MICHAEL BELFIORE for a conversation about DARPA, the maverick and controversial Defense Dept. group, whose futuristic work has had amazing civilian and military applications.

NOTED SCIENTIST COMMENTS ON "The FOURTH KIND" ... KIND OF FAKE? – By Breeanna Hare, CNN, Sunday, November 8, 2009

EXCERPT – "I think that it's fun to have fictional movies about the possibility of extraterrestrial life, but it's important for the public to understand the difference between science and science fiction," Halpern said [Paul Halpern, a physics professor at the University of the Sciences in Philadelphia]. "Almost ALL scientists I know believe that there's NO evidence of encounters between humans and alien life forms.

Right now, astronomers are [still] trying to find evidence of very simple life forms in space."

**"THE HUMAN AGE" –
By David Spangler, Lorian Association,
November, 2009 - #30**

Almost 20 years ago, I started teaching workshops and classes on finding and tapping one's deepest spirit. These programs were meant to be both inspirational and practical, giving tools for finding one's inner sources of creativity. They were precursors to the more advanced and sophisticated work I eventually developed through Incarnational Spirituality. For the most part they were successful in achieving their ends, and people felt empowered by them. But in nearly every class, there was at least one person and sometimes more who had difficulty with one of the key exercises.

WHO IS DAVID SPANGLER?
